# PETROL STORAGE TANKS

---

We are involved in the manufacturing and marketing of an extensive range of Self Bunded as well as Non-Bunded Fuel Storage Tanks suitable for the storage and dispensing of Petrol (Gasoline). FOUR SQUARE METAL CONTRACTING LLC specialty range of petrol storage tanks ranges in size from 500L through to 250 000L.

Petrol is a dangerous combustible substance; it is a highly flammable liquid and can produce vapor which can easily be set on fire and when not handled safely has the potential to cause a serious fire and/or explosion.

This means there is always a risk of a fire and/or an explosion if there is a source of ignition nearby, for example a naked flame, an electrical spark or similar. Because of these risks storing petrol safely is of utmost importance. This is where our expertise comes in to play.

Customized fuel storage solutions are our specialty. Provide us with the details of your storage tank's application and we will design, develop, manufacture and install an intelligent solution that will add value to your business and your surroundings. Our petrol storage tanks can be customized to suit any dimensional limitations required by client.

Currently, we can cater to ADNOC specs, DEWA/ Dubai Municipality specs/ ADCD Specs and ENOC/ EMARAT specs in the UAE.

# CEMENT SILO

---

Our Silos are one of the most well engineered solutions in the MENA region. With almost 5000+ silos fabricated and installed in the last 10+ years, you can be rest assured that we can provide you with the most reliable solution for your projects. We manufacture silos in Mild Steel as well as Stainless Steel.

Our silos find application in batching plants, cement manufacturing plants, concrete mixing on site, road tarring and other infrastructure projects. Cement Silos are an integral part of any batching plant, and you need the best engineered silo design for this.

# LOADING PLATFORM

---

Loading Platforms are used on construction sites for shifting and transfer of materials at different levels of the building. It can be installed and demounted conveniently. It is an efficient and safe transporting technique.

Cantilevered Loading platforms are used in multi-story structures to crane heavy building material or scaffolding material into the structure. They are steel structures with designated load capacities with quick and easy installation and relocation ability.

# CONTAINER TRAILER SEMI TRAILER SKELETON TRAILERS

---

We have been fabricating various material handling equipments for transport and warehouse industries and one of our products we have been making over the years is skeleton or semi trailer which can carry 30 or 40 ft container mainly used in logistics industries. Since there is no railway for transporting goods across the country in Gulf region, businesses depend on transport companies mainly logistics companies to move good in and out of the country. RAFTrailers have been making and shipping container trailers for past 10 years across the Gulf and African countries.
